EN ISO 11612:2015 - A1, B1, C1, F1

*optionally fitted with embroidery, embroidered label, or (thermal) transfers (only valid if made of the same materials as the ones certified with the prototype, as well as the manufacturer specifications regarding the items placement and execution procedures).

The above-mentioned notified body with the given identification code, carried out the (EU) prototype testing and issued the EU Prototype testing certificate with the number EC83331-05

The PPE is subjected to the conformity assessment procedure according to Module D (conformity with the prototype, in accordance with the quality assurance regulations applied for the manufacturing process) under the supervision of DEKRA EXAM GmbH notified body, identified with the code number 0158.

Information concerning the PPE – Regulation 2016/425
The PPE Regulation (EU) 2016/425 is since March 2016 in force, replacing the EU Regulation 89/686/EWG. Article 47 sets the new regulation transitional period.
1. According to the above, the manufacturer is allowed to put on the market protective equipment complying with the provisions of 89/686 EWG until 20 April 2019. The EG type examination and declaration of conformity remain valid until date, provided that the documents validity does not expire afore
2. In compliance with the European Union Regulation 2016/425 as per Paragraph 47, released on 07.12.2017, the following supplementary regulation apply:

The type certificates issued in compliance with the 89/686 EWG provisions, are valid even after 20 April 2019 once the following conditions apply:
1. The standards are unaltered and/or no essential safety relevant issues called for a standard update/revision
2. The PPE is still state of the art
[http://ec.europa.eu/growth/sectors/mechanical-engineering/personal-protective-equipment_de]
The above mentioned article is certified according to IEC 61482-2:2009. Although the standard was updated in 2018, the testing procedures remained unchanged. The tests required in compliance with the new standard, regarding the heat shrinkage and penetration index have already been carried out during the complete certification.

The above-mentioned article is certified according to EN 1149-5:2008. This standard has been replaced with issue 2018. Nonetheless, apart from formal terminology revisions, the testing procedures remained unaltered.

The above mentioned article complies with the transitional period requirements, therefore it can be furtheron marketed.
